

Zeina Mostafa Ali

AI Engineering Student

✉ zeinamostafa254@gmail.com ☎ +201094814750 🔗 LinkedIn 🌐 github.com/zeinamostafa254

Summary

Computer Engineering student with a strong interest in Artificial Intelligence, Machine Learning, and Natural Language Processing. Experienced in developing end-to-end AI projects. Proficient in Python, SQL, pandas, scikit-learn, and Git, with experience developing and deploying AI applications. Passionate about building intelligent systems, conducting AI research, and continuously expanding technical expertise in machine learning, deep learning, and NLP.

Education

Ain Shams University, Faculty of Engineering - Cairo, Egypt
Computer and Systems Engineering Student - GPA: 3.36/4.00

Sep 2024 – Present

Internships

NLP Intern, Cellula Technologies - Cairo, Egypt

Jul 2026 – Present

- NLP: Worked on text preprocessing, data cleaning, and feature extraction for NLP tasks involving large text datasets.
- Model Development: Implemented NLP models for text classification, toxicity detection and Transformer-based applications.
- LLMs & RAG: Developed LLM-based applications using RAG, prompt engineering, and information retrieval techniques.
- Deployment: Built and deployed interactive NLP applications using Python, Streamlit and FastAPI.

Machine Learning Intern , Cellula Technologies - Cairo, Egypt

Feb 2026 – Mar 2026

- Data Analysis: Performed data cleaning, preprocessing, EDA, and feature engineering using Pandas and NumPy.
- Model Development: Built and evaluated machine learning models for both classification and regression using Scikit-learn.
- Deployment: Integrated machine learning models into web applications using Flask and Django.

Samsung Innovation Campus (SIC) Intern, AI Program - Cairo, Egypt

Jul 2026 – Present

- Currently participating in a 300-hour training program covering machine learning, deep learning, computer vision, AI automation.
- Completing hands-on assignments and practical projects that strengthen both theoretical knowledge and technical skills.

Technical Skills

Languages | Libraries: Python, C++, SQL | Scikit-learn, Pandas, NumPy, Matplotlib, Tensorflow, Keras

NLP & LLMs: LangChain, LangGraph, Hugging Face Transformers, RAG, Prompt Engineering, Vector Databases

Data Analysis: Data Cleaning, Data Preprocessing, Exploratory Data Analysis (EDA), Data Visualization, Power BI

Frameworks | Tools: Streamlit, FastAPI, Flask, Django | Git and GitHub

Soft Skills: Leadership, Analytical Thinking, Research Skills, Communication Skills, Time Management

Projects

AI Coding Assistant , RAG & LLM Application

- Developed an AI coding assistant with code explanation, generation, intent classification, and conversational memory.
- Implemented a RAG pipeline using embeddings and vector databases for improved response generation.

Toxicity Detection , NLP Classification Project

- Developed an NLP classification model to detect toxic (text and images) using RNN and LSTM models & save records to a database.
- Deployed the model as an interactive Streamlit application.

Uber Fare Prediction , Machine Learning Regression

- Built and deployed a machine learning regression model using Random Forest for ride fare prediction using Django.

Hotel Booking Prediction , Machine Learning Classification

- Built a ML model to predict hotel booking cancellations using data preprocessing, EDA & deployed it using Flask.

Courses & Certificates

Machine Learning Specialization — Coursera, Stanford | **Deep Learning Specialization** — Coursera, DeepLearning.AI |

AI and Machine Learning Bootcamp — Sprints | **AWS Skill Builder** — AI Practitioner Learning Path
